

Wind Energy Survey

As fossil fuel prices sky rocket, renewable energy development is prevalent. In an attempt to be proactive, a group, through Sumner County Economic Development, has been assembled to discuss a plan of action. This survey is designed to gain your knowledge, attitudes, and concerns which will assist the group in identifying what is important to all residents. Please return this survey so we, as a community, can create a quality recommendation for development. Leave blank any questions you choose to not answer.

1. Do you favor development of renewable power?

Very Much Somewhat Not Sure Against It
